

New 2011 Sirelia *Siccum*

A slim, stylish Thermo-ceramic Cell radiator

Presenting our latest energy efficient radiator, the Thermo-ceramic cell filled Sirelia Siccum. This new addition to our range provides excellent natural, evenly distributed ambient warmth for maximum comfort. The white clay used to produce the light cells has been used in the manufacturing process of bricks and chimneys for over two centuries, its composition and the way it is baked transforms it into an extremely thermo-efficient, safe and durable ceramic, a perfect mix of style and performance.

**Complete with advanced
Seven Day Programmer**

The *Sirelia Siccum* combines stylish lines with the latest technology to produce a comfortable mix of radiant and naturally emitted heating with a uniform surface temperature. The superior quality aluminium body and internal Thermo-ceramic cells are designed to ensure maximum energy efficiency, a precise thermostat automatically regulates your heating requirements and the sleek integral user-friendly LCD programmer enables multiple programming options, all in addition to the standard frost protection, background and comfort settings. Fully certified in compliance with EU and UK regulations.

Inexpensively easy to install - Complete control

Watts	Size in mm H/W/D	Weight Kg	Best value!
900	575/640/80	10.00	£240
