

Roma *Classic* & Firenze

The simple guide to programming

FIRST, ensure the Roma is correctly connected to the power supply (The ROMA is double insulated, so the cable does not have an earth wire. **The Black Wire** is a signal wire for use with an external programmer, **DO NOT** connect it to the Live, Neutral or Earth, otherwise it will destroy the thermostat) then turn on the unit (switch on the back bottom right hand side) The Roma will automatically revert to **FR** (Free mode) Then use the **+** & **-** keys to select target temperature to be maintained.

TO SET TIME AND DAY

Press **C/M** & use the **+** & **-** keys to select hour

Press **C/M** & use the **+** & **-** keys to select minutes

Press **C/M** & use the **+** & **-** keys to select day (e.g. 1=Mon, 2=Tue, 3=Wed etc.)

Press **C/M** to confirm (Now time & day is set)

TO REPEAT DAILY PROGRAMME

Press **P/PROG** & use the **+** & **-** keys to select the daily programme to run (1-9 preset)

Press **P/PROG** to confirm (Now this day programme selected will be repeated every day)

TO EDIT DAY PROGRAMME (To suit your own times)

LONG PRESS **P/PROG** (The timeslot between Midnight & 1am will flash)

Press **C/M** to select either, a FROST PROTECTION, BACKGROUND or COMFORT temperature setting for this time slot.

NEXT use the **+** or **-** key to move forward or backwards between the hour time slot you wish to change & repeat press **C/M** to select either a FROST PROTECTION, BACKGROUND or COMFORT temperature setting for this time slot. When the day is set press **P/PROG** to confirm (This programme will now be repeated on a daily basis).

TO EDIT DAY TEMPERATURES (To suit your own requirements)

Whilst the daily programme is running:

LONG PRESS **C/M** & use the **+** & **-** keys to select COMFORT temperature.

Press **C/M** & use the **+** & **-** keys to select BACKGROUND temperature.

Press **C/M** FROST PROTECTION preset 7 degrees

& FOLLOW SET TIME / DAY in adjustments necessary.

TO OVERRIDE FROM DAILY/WEEKLY PROGRAMME TO FREE MODE

Press **OFF/HOUSE** TWICE & The Roma will automatically revert to **FR** (Free mode) Use the **+** & **-** keys to select target temperature to be maintained.

TO LOCK AND UNLOCK THE CONTROL PANEL

Press & hold the **+** & **-** keys TOGETHER

WEEKLY PROGRAMMING

A weekly programme is made up of day programmes. e.g. If you would like Monday to Friday programmed the same but Saturday different & Sunday different:

Edit a day programme to suit your requirements for Mon to Fri (**P1**)

Edit a day programme to suit your requirements for Sat (**P2**)

Edit a day programme to suit your requirements for Sun (**P3**)

Select the WEEKLY PROGRAMME mode (**AU**) by pressing **P/PROG** & using the **+** and **-** keys. Press **P/PROG** to confirm.

TO INSERT YOUR DAY PROGRAMMES INTO THE WEEK

Press **P/PROG** & use the **+** & **-** keys to select **AU** (weekly programme).

Press **P/PROG** to confirm.

LONG PRESS **P/PROG** (day 1 will flash =Mon) & use the **+** & **-** keys to select the day program to run for that day.

Press **C/M** (day 2 will flash =Tue) & use the **+** & **-** keys to select the day program to run for that day.

Press **C/M** (day 3 will flash =Wed).....AND SO ON

Once all seven days have been programmed press **P/PROG** to confirm,

Now this weekly programme selected will be repeated every week.

Please take special notice: If you programme your ROMA radiator/s to match your heating requirements (times and temperatures), you will minimize use of energy, therefore your heating costs will be further reduced.
