

CONTROL AND PROGRAMMING OPTIONS

ANALOGUE

(CALI Radiator)

A manual turn-dial control on each radiator enabling temperature and mode settings but without any programming ability,

LCD Programmer

(CALIDUS & ANGLIA Radiators)

A 7 day LCD programmer/timer on each radiator enabling pre-set scheduled times and temperatures to be set for each day over 7 day period which is automatically repeated every 7 days.

ZoneRay

(Can be used with all our radiators)

A central wireless programming and control system enabling pre-set scheduled times and temperatures to be set for each day over 7 day period which is automatically repeated every 7 days. Manages the heating requirements for up to six individual zones.

IntellyGreen

(Can be used with all our radiators or and electrical appliance)

The ultimate energy management, programming and control system. Enables centrally and wirelessly the programming of each individual radiator or zone. IntellyGreen monitors real-time energy consumption and running costs and provides historic operating data, a complete system to ensure maximum savings.
