

DESIGN II COMFORT II INNOVATION

SIMPLE INTELLIGENT EFFICIENT FLEXIBLE

A slim classically stylish ergonomic design to suit any interior, the Cali Sense ensures a perfect combination of performance and economy and adapts itself to every aspect of your environment. Advanced technologies, control abilities and exclusive design substantially lower operating costs creating a perfect balance between temperature and comfort. The EcoSense[®] technology incorporates state of the art PIR sensors to detect room by room occupation. Unoccupied rooms will automatically reduce their temperature to save energy. Packed with state of the art features like real time energy consumption indication, occupancy detection and pin code locking, the Cali Sense is the perfect choice for private, commercial and rented properties.

The friendly heating

Choosing a product certified by LCIE Bureau Veritas lets you know the company complies with strict standards and procedures. From extensive product testing to unannounced plant inspections, every aspect of a product's development is thoroughly evaluated before it can earn their certification. Most importantly, NF certification is not a one-time event, but involves regular on-site inspections of manufacturing facilities and regular re-testing of products to ensure that they continue to meet the same high standards required to maintain certification over time. Products that earn NF certification display the applicable NF certification mark to show that they have been tested by one of today's most respected independent product testing organizations.

Standards: Low voltage RoHS EN55014-1; EN55014-2; EN60335-1; EN60335-2-30; EN50581 EN61000-3-2; EN61000-3-3 FN62333
